Multimodal AI Lab, KAIST

## Research Interest

---

My research focuses on multimodal AI, with a particular interest in cross-modal alignment spanning diverse sensory modalities — including vision, audio and touch. I explore how self-supervised learning captures correspondences across modalities, aiming to connect and interpret multi-sensory information in real-world environments.

## Education

## Experiences

---

Last Updated: April, 2026

### Multimodal AI Lab, KAIST

Undergraduate Research Intern

Mar 2022 – Feb 2023

South Korea

- Advisor: Joon Son Chung
- Audio-Visual Learning, Sound Source Localization, Speech Recognition

### VIC Lab, KAIST

Undergraduate Research Intern

Dec 2021 – Feb 2022

South Korea

- Advisor: Munchurl Kim
- Computer Vision, Super Resolution

### SMILE Lab, KAIST

Undergraduate Research Intern

Jun 2021 – Aug 2021

South Korea

- Advisor: Song Min Kim
- Machine Learning, Embedded System

## Skills

---

**Programming:** Python, PyTorch, C

**Languages:** Korean (Native), English (Fluent)

## References

---

### Joon Son Chung

Associate Professor, Electrical Engineering
